Experience

Web Developer

[Spiraledge](#)

12/2022 - 09/2023

- As a skilled web developer, my role has been defined by ensuring a secure, efficient, and user-friendly interface using: **Shopify's Third-Party, Liquid, JavaScript and .Net**:
- Utilized these technologies to enhance user experience and maintain a high level of product security.
- **Jira**: Made extensive use of Jira for collaboration with US and VN team, troubleshooting, and effective project management.
- **Tray.io**: I employed Tray.io to create webhooks for Netsuite, facilitating a seamless exchange of data and automation of processes.
- **.NET Framework**: I also used .NET tools to integrate data into systems, improving efficiency and data accuracy.
- **API Creation and Integration**: Developed APIs for automation and integration purposes, increasing system efficiency and data accuracy.
- **Google Analytics 4 (GA4)**: Implemented event tracking functions to deliver insightful user behavior data to the DS team, improving the ability to make data-driven decisions.
- **Security Focus**: Always maintained a strong focus on security best practices, resulting in a safe and trustworthy environment for users..

Frontend Freelance

[Plogg](#)

03/2023 - 04/2023

- Working on **Vue.js** and **Vuetify** to enhance the user experience, update the layouts of the website. Additionally, I updated some complexity validate for several feature

Education

Bachelor

HCM National University
Information Technology

Thu Duc, Ho Chi Minh

09/2021 - Present

- Major in Information Technology

Projects

• RAINE BOT :

The **virtual assistant** can interact with users through Discord, using the **Azure OpenAI service** to, and The virtual assistant's agent:

- Setup reminders task based on user prompt
- Create or ask about images as required through prompts from user
- Searching, scraping and updating to user with the the **real-time** events, data from internet
- Interacting directly with database using LlamaIndex
- Getting weather conditions of a specific location

Integrated use of **redis** to cache conversations

Tech: (NodeJS, Python, Discord.js, Redis, Prisma, MySQL, Azure OpenAI, OpenAI, LangChain, LlamaIndex, puppeteer, LLM, Browerless, Serper, Elevenlab, Whisper, Docker)

Discord Bot: [Github](#) (09/2023 - Present)

• VIRTUAL ASSISTANT (The TOP 1 team's project of Microsoft & Sun hackathon for Azure OpenAI service):

The **virtual assistant** can interact with users by using video call, screen share or text, using the **Azure OpenAI service** to, and The virtual assistant's agent:

- Setup reminders task based on user prompt
- Create or ask about images as required through prompts from user
- Searching, scraping and updating to user with the the **real-time** events, data from internet
- Interacting directly with database using LlamaIndex
- User can **call video** or **share screen** directly with virtual assistant
- Getting weather conditions of a specific location

Integrated use of **redis** to cache conversations
